## 1 Home page

First of all, in the left, we see the button for the *Home* section, that is the exact page we are in at this moment. Of course, the whole navigation bar is not visible when there's no user logged. In that case, you can only see the login button.

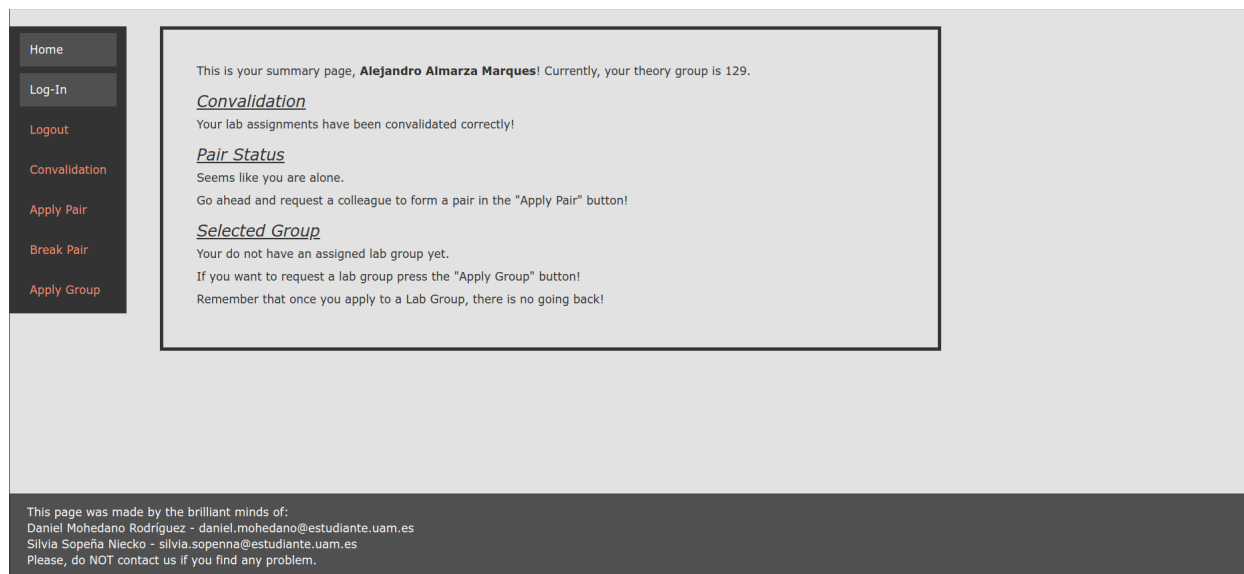

Under *Home*, there's the login button. The user can login into the page by clicking on it. This will load a new page about which we are going to talk later on. There are important contents that the user needs to know in advance. While not logged in the page shows the information about the website to inform the student of its services.

Once the user logs in, the home page changes. If the user is logged, then they can access to the rest of the contents of the sidebar. For example, they can see a *Logout* button. This button ends the user's session so that a new user can login. If they want to apply a group or a pair, they need to click on the *Apply group* or *Apply pair* button. This will redirect the user to a new page depending on which option they are interested in. The *Break pair* button works similarly. Next, we have the *Convalidation* section, also a clickable part of the left menu that leads the user to convalidate its grades.

The content of the home page shows the information about the user that is logged in. That is, if their grades are convalidated, the they are part of a pair or not and if they have selected a lab group.

In every page we are in we can see a section located down the screen. That's the footer in which we add information about the creators of the web page, that is, our names and e-mail.

## 2 Apply pair

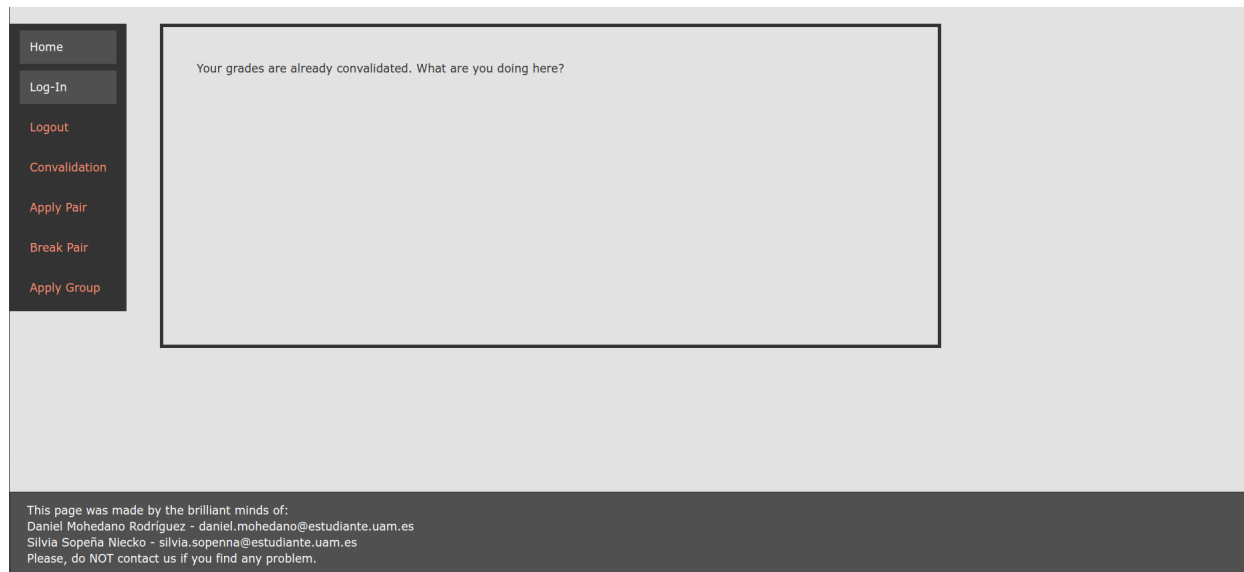

In this page we can see a drop down in which the information of every possible pair candidate is shown. The logged user has to choose who they want to be pair with and wait for the second members confirmation. As in the other pages, this information is also mentioned to allow the user to understand how the full service works.

## 3 Apply Group

Here we got another drop down that shows all the available groups that the user can choose to be a part of. They must simply click on the desirable group. The user should only be able to use this page when the application is opened (at a certain date).

## 4 Convalidation

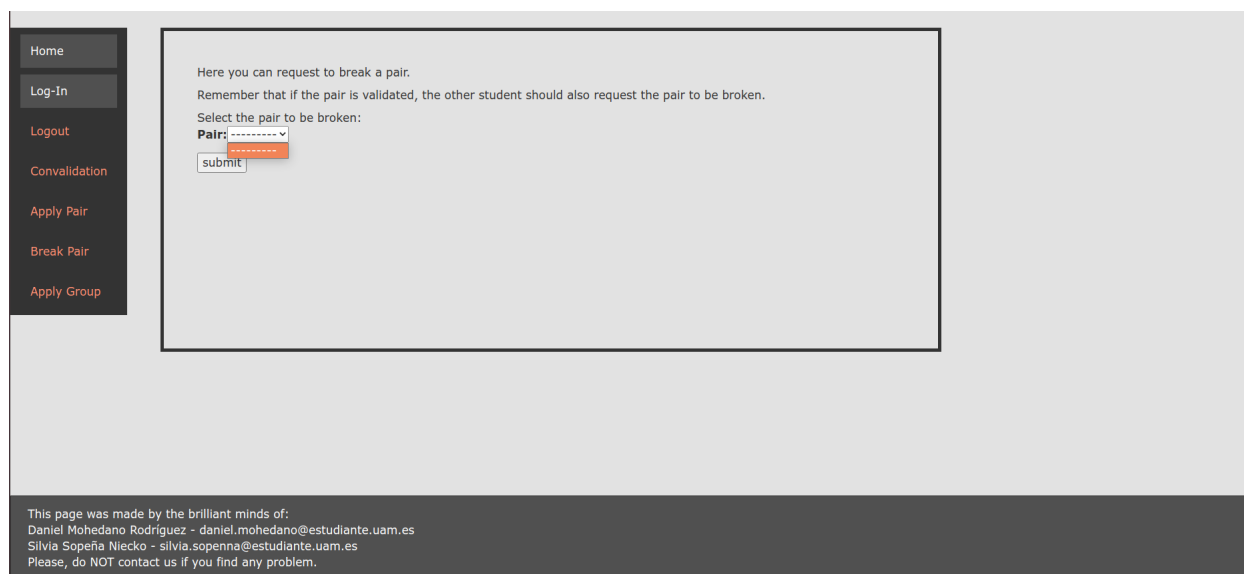

By accessing this page the user can request a convalidation of the grades of the last year. This is done automatically when accessing the page, so the page just shows the result of the convalidation.

The screenshot shows a web interface for the 'Convalidation' page. On the left is a dark sidebar with a menu containing: 'Home' (highlighted), 'Log-In', 'Logout', 'Convalidation' (in orange), 'Apply Pair', 'Break Pair', and 'Apply Group'. The main content area is a large light gray rectangle with a black border containing the text: 'Your grades are already convalidated. What are you doing here?'. At the bottom of the page is a dark footer with the text: 'This page was made by the brilliant minds of: Daniel Moledano Rodríguez - daniel.moledano@estudiante.uam.es, Silvia Sopeña Niecko - silvia.sopena@estudiante.uam.es. Please, do NOT contact us if you find any problem.'

## 5 Break Pair

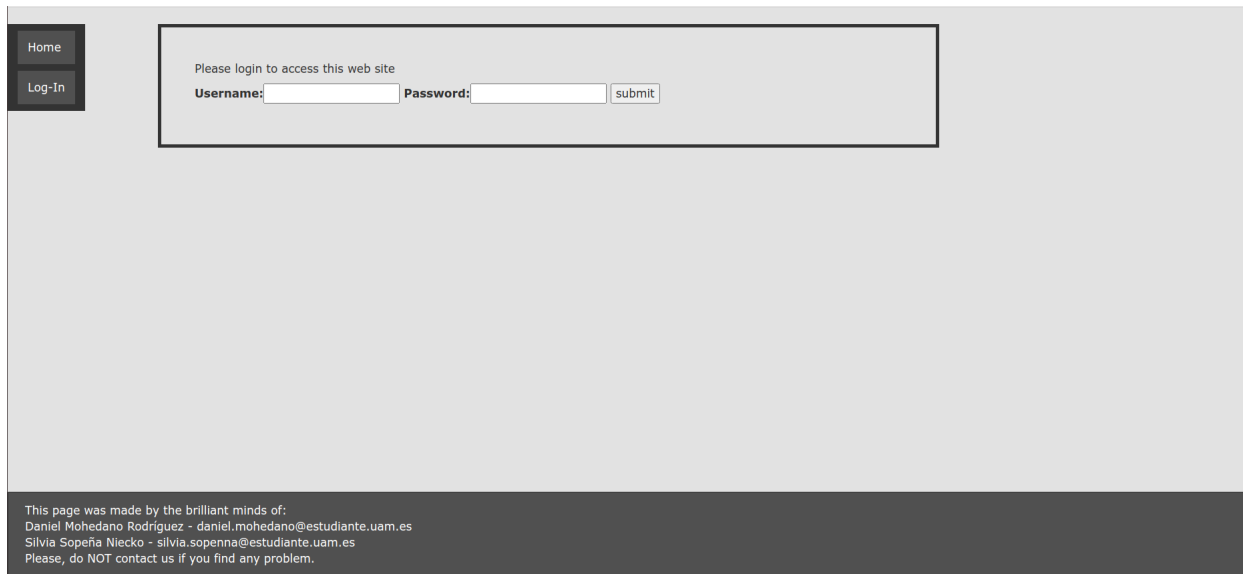

In this page the user can use a drop down menu to select between the pairs they are a part of (both validated and not). They can request to break it after the selection. After that, a message will be shown indicating if the pair was broken correctly or if the other member of the pair should also request the break.

The screenshot shows a web interface for the 'Break Pair' page. The sidebar is identical to the previous page. The main content area is a large light gray rectangle with a black border containing the following text: 'Here you can request to break a pair.', 'Remember that if the pair is validated, the other student should also request the pair to be broken.', 'Select the pair to be broken:', 'Pair: [dropdown menu]', and a 'submit' button. At the bottom of the page is a dark footer with the same text as the previous page: 'This page was made by the brilliant minds of: Daniel Moledano Rodríguez - daniel.moledano@estudiante.uam.es, Silvia Sopeña Niecko - silvia.sopena@estudiante.uam.es. Please, do NOT contact us if you find any problem.'

## 6 Login

This page is essential for the use of the website, since almost all navigation requires the user to be identified. We can see two fields: Username and Password. The user should just log in with their credentials to gain access to the whole site.

The screenshot shows a web application interface. On the left, there is a vertical navigation menu with two buttons: "Home" and "Log-In". The "Log-In" button is highlighted. The main content area is a light gray rectangle. Inside this area, there is a smaller white rectangle with a black border. At the top of this white rectangle, it says "Please login to access this web site". Below this, there are two input fields: "Username:" followed by a text box, and "Password:" followed by a text box. To the right of the password field is a "submit" button. The bottom of the page is a dark gray footer containing the following text: "This page was made by the brilliant minds of: Daniel Mohedano Rodríguez - daniel.mohedano@estudiante.uam.es, Silvia Sopena Niecko - silvia.sopena@estudiante.uam.es. Please, do NOT contact us if you find any problem."
